118. Pascal's Triangle

Given an integer `numRows`, return the first `numRows` of **Pascal's triangle**.

In **Pascal's triangle**, each number is the sum of the two numbers directly above it as shown:

Example 1:

Input: `numRows = 5`

Output: `[[1],[1,1],[1,2,1],[1,3,3,1],[1,4,6,4,1]]`

Example 2:

Input: `numRows = 1`

Output: `[[1]]`

Constraints:

- `1 <= numRows <= 30`
