110. Balanced Binary Tree

Given a binary tree, determine if it is

height-balanced.

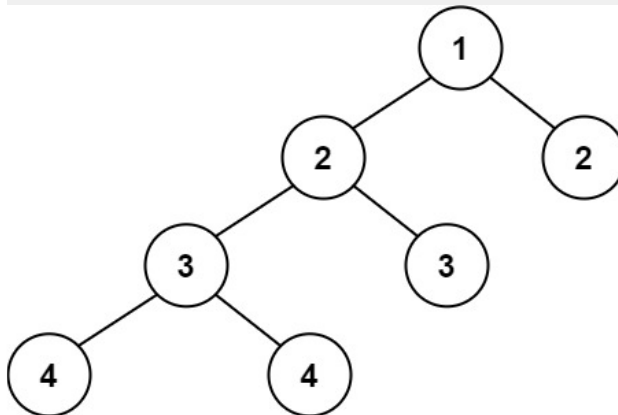

Example 1:

Input: root = [3,9,20,null,null,15,7]

Output: true

Example 2:

Input: root = [1,2,2,3,3,null,null,4,4]

Output: false

Example 3:

Input: root = []

Output: true

Constraints:

- The number of nodes in the tree is in the range `[0, 5000]`.
- `-104 <= Node.val <= 104`
